Experience

Hacking

The Hack Font An alternative compilation of the Hack font “alt-hack0” and a custom compilation script “alt-hack”.

Emacs

coleslaw-mode for the Coleslaw blog generator.

font-lock-cl highlight all the atoms from the Hyperspec (upstream).

Spacemacs These keybinding layers were added upstream:

rectangle

kmacro

quickurl

ediff

Websites <https://equwal.com> using minimalist software: alpine linux, quark, varnish, hitch, etc.

Common Lisp IDEs Some contributions to Sly, Swiper, and Ivy which are parts of a Common Lisp environment in Emacs.

Window Managers Various features and bugfixes for StumpWM and the contrib libraries. Patched dwm.

Minimalist Utilities Contributions to communities of minimalist programmers including:

Suckless dwm

Bitreich sacc “ebuild” layer for Gentoo

r36 Gentoo tools

Research

SL package dependency language.

Esperanto Morphological Compression

Dijkstra’s EWDs

Transcriptions: Transcription and summaries of some of Dijkstra’s fundamental Computer Science works in the University of Texas archive.

Service

Mirror: Mirroring clic since the git repo for it is on a gopher site and requires clic to access it!

Languages

Human

English – Native, TEFL certificate

Portuguese – Advanced

Programming

A lot C, Common Lisp, Emacs Lisp, perl, Scheme, POSIX shells
Less APL, Clojure, Haskell

Markup

L^AT_EX, HTML, CSS, roff, org

Skills

Git

Vim, Emacs

Linux, unix tools, suckless tools

Education

San Francisco State University

Mathematics Bachelor of Arts – current

Cuesta Community College

Associate in Arts Liberal Arts: Mathematics and Science

Associate in Arts Liberal Arts: Social and Behavioral Sciences
